

## Need A Crystal But Don't Want to Order A New One ???

8 April 2011

If you need a crystal for an oscillator circuit, for a repair etc, the following link **may** help you out :

**CW Operators' QRP Club Crystal Swap and Buy Page**

**(<http://www.users.on.net/~zietz/qrp/webxtals/>)**

alias <http://www.users.on.net/~zietz/qrp/webxtals/> (<http://www.users.on.net/~zietz/qrp/webxtals/>)

They also invite people to catalogue and submit their lists of crystals to expand the available listing / stocks...

A crystal close to the required frequency might be able to be "pulled" to exact frequency by using one of the normal methods : series C, shunt C, series L or shunt L.
